

GREEN-TECH™

4 Hour Cure Acrylic Urethane

For
Bathtub, Tile, &
Countertop Refinishing

Looking for an eco-friendly coating system that's VOC compliant?

Introducing... **GREEN-TECH Acrylic Urethane**
4 HOUR CURE • VOC COMPLIANT

▶ SAME PROVEN URETHANE FORMULA

GREEN-TECH employs the same two-component Glas-Tech 9000 acrylic urethane technology that has been so popular and that has played such a dominant role in the bathtub, tile, & countertop refinishing industry since 1985. With over 40,000,000 successful applications worldwide, this proven formula is now available in an eco-friendly version that not only meets U.S. EPA standards for volatile organic compound emissions, but cures in 4 hours.

The secret to this coating system's durability lies in the unique resin-rich layer that forms on top of the coating as it is applied and reaches cure. What you see cosmetically as a super high gloss finish and superior distinction of image is actually is a barrier layer that makes GREEN-TECH highly resistant to impacts, chemicals, and moisture. This time tested topcoat is also 100% UV resistant and colorfast.

- Same Proven Urethane Formula
- V.O.C Compliant

GREEN-TECH™

4 HOUR CURE • VOC COMPLIANT

For
**Bathtub, Tile, &
Countertop Refinishing**

▶ **V.O.C. COMPLIANT**

GREEN-TECH is environmentally friendly and meets or exceeds local, state and federal rules for V.O.C. emissions. With local governments throughout the U.S. adapting to EPA rules, why risk fines or a business interruption when you can safely and legally use and store compliant products and not have to worry about when rules may change in your area without your knowledge?

Be the first in your area to promote your business by using "green" products. The lodging, apartment, and building market segments are promoting their industries as eco-friendly and "green". Cash in on this hot new trend and increase your business!

▶ **SUPERIOR 4-HOUR CURE**

Hawk's *GREEN-TECH* topcoat cures in 4 hours by utilizing the latest advances in curing agent technology. Sophisticated compounds deliver more superior impact, scuff, stain & water resistance at 4 hours than traditional mega-cure products on the market. This "Quick-Cure" system gives your company a distinct edge by ensuring your finish is cured and ready to return to service, which leads to long-term coating life and satisfied customers. Isn't your reputation worth it?

Another important feature is that *GREEN-TECH*'s initial dry time after application is 30% faster than most mega-cures, which means that you can quickly and safely perform clean-ups and then caulk without having to wait or worry about marring the finish. After all....time is money!

▶ **USER FRIENDLY**

The *GREEN-TECH* topcoat system is very user friendly. It is easy to apply, even for novice applicators. Uniformity of the film and high gloss is achieved quickly without the orange peel or loss of gloss associated with other mega-cure type urethanes.

And because *GREEN-TECH* is V.O.C. compliant, it can be purchased in Hawk's *Easy Pour-Easy Carry™* ½ Gal & 1 Gal plastic containers, eliminating the need to purchase your product in wasteful and expensive 1 quart exempted containers.
