ISOFREE PLUS™

"Isocyanate-Free Urethane System"

A WORD ABOUT ISOCYANATES

Some high performance urethane systems use isocyanates to provide dense cross-linking of the paint molecules to produce extremely durable film properties.

However, some individuals can become sensitive to isocyanates over time. Non-isocyanate coatings produced in the past eliminated the exposure to isocyanates but the coatings overall performance suffered.

With Hawk's *ISOFREE PLUS™* urethane not only are you isofree but also gain the superior performance and durability associated with isocyanate-based systems.

ISOFREE PLUS™ is a isocyanate-free acrylic urethane coating system that is formulated to endure high moisture laden environments for extended periods of time.

ISOFREE PLUS outperforms ordinary isocyanate-free coatings by delivering exceptional film hardness, gloss retention, chemical & stain resistance.

ADVANTAGES OF ISOFREE PLUS

▶ Super Fast Dry To Recoat Times

ISOFREE PLUS saves you time and money by minimizing wait times between coats. Faster dust free times reduces application imperfections, such as dust particles, leaving your finished work blemish free.

▶ Faster Dry To Touch

With *ISOFREE PLUS*, technicians can quickly & safely remove job site masking and even install caulk after an application thus eliminating the need for a return trip. Your customers will appreciate the convenience and pay a premium for it.

ISOFREE PLUS™

"Isocyanate-Free Urethane System"

With Hawk's
ISOFREE PLUS™
Isocyanate-Free coating
system you gain:

- ✓ FASTER DRY TIMES
- ✓ EASE OF APPLICATION
- ✓ LESS MASKING
- ✓ QUICK CLEAN-UPS
- ✓ HIGHER GLOSS
- ✓ SUPERIOR FILM STRENGTH

► Easy To Apply

ISOFREE PLUS has excellent flow characteristics that promote *high-gloss* and *self-leveling*. Special anti-sag agents allow the technician to quickly build film strength on vertical surfaces without runs and sags. Also, there is no need to add more reducer during the application process to obtain a higher gloss or more uniform film. With **ISOFREE PLUS**, every coat is glossy and smooth.

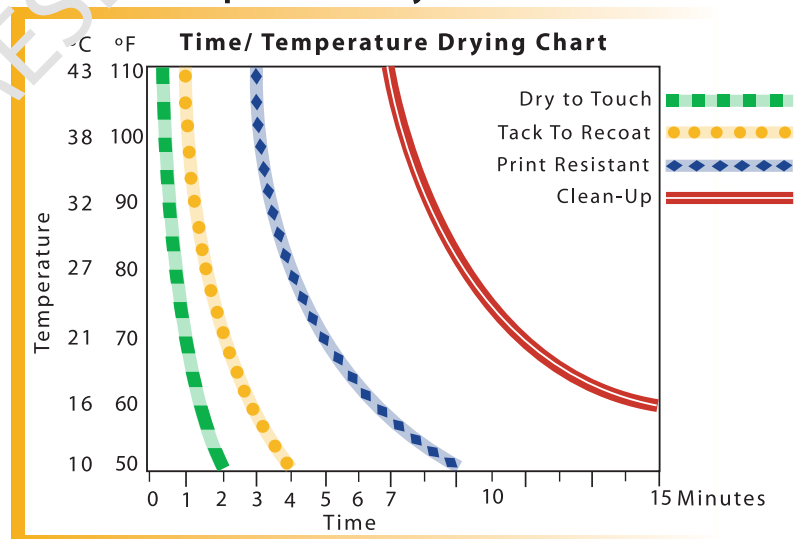

► Super High Gloss

ISOFREE PLUS is engineered to produce a *high gloss finish* throughout the application. With a gloss rating of 95+, your customers will love the sparkling new look, while you benefit from the ease application.

► Superior Performance

At full cure **ISOFREE PLUS** delivers superior impact, chemical, and stain resistance, surpassing the performance of typical isofree coatings (See the Performance Data Guide for more details). Superior long-term performance means greater customer satisfaction and repeat business...*the secret to success.*

Super Fast Dry Times!

"Laboratory Tested"

Discover why **ISOFREE PLUS** is the preferred coating system of professionals who demand quality, ease of application, and safety. For more detailed information and samples contact Hawk today at 800-321-4295!
