# GLAS-TECH 9000™ 4-HOUR CURE TOPCOAT RESIN

## SUPERIOR TO MEGA CURE TYPE TOPCOATS

If you are currently using a "mega cure" fast drying topcoat and you are not satisfied with dry times, ease of application, or uniformity of gloss, you should try Hawk's *Glas-Tech 9000 4-Hour Cure Topcoat Resin*.

*Glas-Tech 9000 4 Hour Cure Resin* is a very high solids, fully cross-linked aliphatic Acrylic Urethane Two-Component System. High solids and high cross-linking are the keys to a coatings durability, performance, and longevity. With millions of successful applications worldwide, the *Glas-Tech* family of resins are a time tested and proven coating system that you can trust.

### HOW IS GLAS-TECH 9000's 4-HOUR CURE RESIN BETTER?

#### ▶ FASTER INITIAL DRY TIMES

*Glas-Tech 9000 4-Hour Cure Resin* has faster dry to tack and dry to touch properties than most "mega cure" fast drying topcoat\*. This quick cure capability translates to faster re-coat times and allows you to perform masking removal in as little as 15 minutes! Why waste time waiting for your topcoat to dry so you can clean up? Eliminate having to make a return trip to clean and caulk! Faster dry to touch times also means you can spray additional coats faster, increasing your productivity.

#### ▶ SUPERIOR CURE

*Glas-Tech 9000 4-Hour Cure Resin* employs a unique blend of next generation curing agents in a high solids formula to enable the applied film to develop a superior cure after only 4 hours, as compared to standard fast dry topcoats.

With increased pencil hardness (resistance to impacts), faster film dry through (better scuff resistance), and increased moisture resistance, your refinished tubs truly cure faster and are more fully cured to return to service than traditional "mega cure" fast drying topcoats. Your refinishing work will look better & last longer providing more value to your customers while you gain their repeat business and their loyalty.

## 4-HOUR CURE TOPCOAT RESIN

HIGH-GLOSS & SEMI-GLOSS FORMULA

### KEY BENEFITS OF USING GLAS-TECH 9000 4-HOUR CURE TOPCOAT RESIN

#### ▶ HIGHER GLOSS

Hawk's *Glas-Tech 9000 4-Hour Cure Resin* develops higher gloss and distinction of image than most "mega cure" fast drying topcoats. The secret lies in the thick resin rich layer that forms on top of the film as it is applied, providing added durability and producing a sparkling high gloss finish that your customers will love.

#### ▶ EASY TO APPLY

Our *Glas-Tech 9000 4-Hour Cure Resin* delivers a superior overall spraying experience for the refinisher, performance you can count on each and every application, unlike some "mega cure" fast drying topcoats. Even and consistent flow out, uniform build, better anti-sag properties, and higher gloss...shouldn't you expect that from your topcoat coating system?

#### ▶ SEMI-GLOSS AND CLEAR

The *Glas-Tech 9000 4-Hour Cure Resin* is also available in a semi-gloss for use on countertops and cabinets and in a high gloss clear for unique applications.

#### ▶ PACKAGING

*Glas-Tech 9000 4-Hour Cure Resin* is packaged in Hawk's plastic Easy Carry Easy Pour™ gallon, half gallon, and quart containers. We stock all standard plumbing fixture colors. Hawk's color quality control and consistency from batch to batch is well known in the refinishing industry. Custom colors are also available upon request.

*Improve your process, increase your productivity and add to your profits...  
after all, isn't your time your most valuable asset?*
